February 2011 Vol 49 No. 1

Contents

EDITORIAL
Paediatric laparoscopic surgery issue, Peter Beale

KEYNOTE ADDRESS
‘See one, practise on a simulator, do one’ – the mantra of the modern surgeon, J. I. Curry

UROLOGY
Exciting times: Towards a totally minimally invasive paediatric urology service, John Lazarus

UROLOGY – TRANSPLANTATION
Overcoming the learning curve in hand-assisted laparoscopic live donor nephrectomy – a study in the animal model, J. Loveland, C. Joseph, D. Liakos, R. Botha, R. Britz

Hand-assisted laparoscopic live donor nephrectomy – initial experience, J. Loveland, D. Liakos, C. Joseph, J. R. Botha, R. Britz

ANAESTHESIA
Anaesthetic considerations for paediatric laparoscopy, L. Lasersohn

NEONATAL SURGERY
Neonatal laparoscopy, Alp Numanoglu, Angus Alexander

Oesophageal atresia without tracheo-oesophageal fistula and an anorectal malformation: Advantages of a primary laparoscopically assisted anorectal pull-through, M. Arnold, D. Sidler, S. W. Moore

THORACOSCOPY
Paediatric thoracoscopy: State of the art, M. L. van Niekerk

TRAINING
A survey on the current status of laparoscopic training in paediatric surgery in South Africa, P. S. Stevens, M. de Villiers, M. L. van Niekerk

GASTRO-INTESTINAL
A comparison of laparoscopic-assisted (LAARP) and posterior sagittal (PSARP) anorectoplasty in the outcome of intermediate and high anorectal malformations, C. de Vos, M. Arnold, D. Sidler, S. W. Moore

Laparoscopically inserted button colostomy as a venting stoma and access port for the administration of antegrade enemas in African degenerative leiomyopathy, M. Chitnis, C. Lazarus, I. Simango, M. Elsen, C. van Rensburg, D. von Delft, L. Tovell-Trollope

Laparoscopic treatment of type III para-oesophageal hernia, M. L. van Niekerk

Cover: A neonate undergoing laparoscopic-assisted pull-through for Hirschsprung’s disease. Children, particularly infants and small babies, often demonstrate this light effect during laparoscopy because of their thin abdominal wall. (Photo by Prof. Jenny Thomas)
